

Austin-Chris Iwu

Full-Stack Developer | Embedded Systems Engineer

Owerri, Nigeria | austinchrisiwu@gmail.com | austinchris.me | github.com/AustinChris1 | linkedin.com/in/austinchris1 | t.me/thatcreator

PROFILE

Full-stack developer and Electrical/Electronics Engineering graduate with experience building production web platforms, embedded systems, computer-vision tools and blockchain products. Strong across React, Laravel, Node.js, Firebase, ESP32/Arduino and modern deployment workflows. Delivered 30+ projects, including LMS, e-commerce, school-directory, face-recognition security and AI + IoT systems. Active open-source contributor to the Zcash ecosystem via ZecHub.

EXPERIENCE

Software Developer | First Digit Communications Ltd.

Sep 2024 - Present

Abuja, Nigeria | Full-stack and embedded delivery

- Built FirstDigit Academy, a learning-management system with courses, enrollment, progress tracking and interactive learning using React, Laravel and MySQL.
- Developed FirstSmart Mart, an e-commerce platform with cart, checkout, inventory, admin dashboard, Paystack and bank-transfer payments.
- Engineered a face-recognition security and Telegram-alert system using Node.js, face-api.js and ESP32-CAM.
- Delivered School Finder, SOHADAN and First Digit corporate web platforms with responsive, production-ready interfaces.

Independent Developer | Web, IoT and Blockchain

2021 - Present

Self-directed product engineering and hackathons

- Designed AgroSense360, an AI + IoT multilingual rover for crop-health monitoring and farmer advisory.
- Built Sign In With Zcash and OG Receipts for blockchain hackathons, shipping authentication and verifiable-AI primitives under deadline.
- Created tools across Solana, Internet Computer/Motoko and event-driven trading, plus responsive React/Tailwind product interfaces.

Open Source Contributor | ZecHub (Zcash Ecosystem)

Ongoing

Community-maintained Zcash education and ecosystem tooling

- Contribute to ZecHub, the community-driven education and documentation hub for the Zcash ecosystem.
- Build open-source tooling for Zcash, including Sign In With Zcash (SIWZ), a non-custodial wallet-authentication primitive.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, PHP, Python, C/C++, SQL, Motoko, HTML, CSS
Frontend	React, Next.js, TailwindCSS, GSAP, Three.js, Framer Motion, Bootstrap
Backend/Data	Laravel, Node.js, REST APIs, MySQL, Firebase
Embedded/AI	ESP32, ESP32-CAM, Arduino, Raspberry Pi, IoT sensors, MediaPipe, face-api.js
Blockchain	Solana, Internet Computer, Motoko, Zcash, OG Compute/Storage/TEE
Tools	Git, Linux, Vite, Vercel, Cloud Deployment, Telegram Bots, Paystack

KEY PROJECTS

AgroSense360 - AI and IoT Multilingual Rover

Final-Year Project

Smart crop-health monitoring and advisory system combining AI vision, IoT sensors and native-language farmer guidance. *React, Firebase, ESP32, Arduino, Python*

Sign In With Zcash (SIWZ) + ZBooks

siwz.vercel.app

Non-custodial wallet authentication for Zcash, plus accounting and payroll tooling for shielded-ZEC teams. *Next.js, TypeScript, ZIPs, ZingoLib*

OG Receipts

Ogreceipts.vercel.app

Verifiable AI prediction track records using TEE sealed inference on OG Compute and timestamped storage proofs. *Next.js, OG Compute, OG Storage*

Atelier Fit

body-measurement-green.vercel.app

Computer-vision tailoring tool that estimates measurements from two photos and height, then exports a measurement card. *React, TailwindCSS, MediaPipe*

EDUCATION

B.Eng. Electrical and Electronics Engineering

Aug 2021 - Oct 2025

Federal University of Technology, Owerri (FUTO) | Electronics and Computing major
