CAREER OBJECTIVE

Electrical and Electronics Engineering graduate of the Federal University of Technology, Owerri, with Second Class Upper (CGPA 4.09 / 5.00). I am looking for work, or a funded graduate place, where a grounding in electrical and electronic systems is useful: industry, energy, engineering operations, or further study. Other work is at austinchris.me.

EDUCATION

B.Eng. Electrical and Electronics Engineering Aug 2021 - Oct 2025
Federal University of Technology, Owerri (FUTO), Imo State, Nigeria
School of Electrical Systems Engineering Technology (SESET)
Electronics and Computing · Second Class Honours (Upper Division) · CGPA 4.09 / 5.00

Final-year project: AgroSense360, a field rover that reads crop condition from onboard sensors and a camera, then gives the farmer advice in a local language.

West African Senior School Certificate (WASSCE) 2014 - 2020
Federal Government College, Okigwe, Imo State, Nigeria

WORK EXPERIENCE

Software Developer · **First Digit Communications Ltd.** Sep 2024 - Present
Abuja, Nigeria (remote from Owerri). Industrial training for the degree was completed here.

- Built a learning platform for the company: courses, student enrollment, and progress tracking.
- Built an online shop with a catalogue, checkout, stock records, and card and bank-transfer payments.
- Built a directory of Nigerian schools so parents can search and compare verified profiles.
- Delivered the company website and the website of a professional association.
- Set up a camera security system that sends an alert when a face is recognised.

LEADERSHIP

Ambassador · **Hyperbolic** 2024
Selected as an ambassador for Hyperbolic, an AI cloud company (hyperbolic.xyz).

CERTIFICATION

Artificial Intelligence and Robotics, Oct 2025. Certificate of completion, organised by SESET, Federal University of Technology, Owerri.

Motoko Bootcamp, Mar 2022. A one-week course in building software on the Internet Computer (ICP) blockchain.

HONOURS AND AWARDS

Best Stablecoin Adoption · Celo Agents at Work Hackathon Sep 2026
For Earmark, a group payment tool. People pay a shared bill, and the money can go only to the account the group locked in at the start.

Wave 1 winner · Midnight Buildathon Sep 2026
For Equilux, a pay-gap report that workers can check, without any individual salary being shown.

Pitched · InnovateX, Blaze by Ecobank 15 Oct 2026
Shigo, for a seller on WhatsApp. The order stays unpaid until the payment shows in her own bank app, so a screenshot is not enough.

SKILLS

Engineering	Electrical and electronics, sensors, embedded systems (ESP32, Arduino), circuit simulation (Proteus)
Computing	Python, C/C++, JavaScript, data handling, web applications
Tools	Git, Linux

LANGUAGES

English · Fluent (language of instruction) **Igbo** · Native **Spanish** · Learning

INTERESTS

I like exploring something new, thinking an idea through, and building it. I also play games, watch movies, and I am learning Spanish on Duolingo.
