SUMMARY

Electrical and Electronics Engineering graduate (Second Class Upper, CGPA 4.09 / 5.00) who builds production web products and the hardware they run on. At First Digit I ship React and Laravel systems for Nigerian businesses and schools. Hackathon wins in 2026: Best Stablecoin Adoption, Celo Agents at Work (Earmark), and Wave 1, Midnight Buildathon (Equilux).

EXPERIENCE

Software Developer · First Digit Communications Ltd.

Sep 2024 - Present

Abuja, Nigeria (remote from Owerri) · React, Laravel, MySQL, ESP32

- Shipped FirstDigit Academy (acad.firstdigit.com.ng): course admin, enrollment, and progress tracking on React with a Laravel/MySQL API.
- Built FirstSmart Mart (spx.firstdigit.com.ng): catalog, cart, checkout, inventory, and Paystack plus bank-transfer payments.
- Launched School Finder (schoolfinderabuja.com), a Nigeria-wide directory from nursery to tertiary with verified profiles and filters.
- Delivered production sites for First Digit and SOHADAN (sohadan.ng), including GSAP motion on the association site.
- Wired a face-recognition security pipeline (Node.js, face-api.js, ESP32-CAM) that posts Telegram alerts on detection.

SELECTED WORK

AgroSense360 · B.Eng. final-year project

2025

ESP32/Arduino rover with a vision pipeline and a React/Firebase dashboard that monitors crop health and advises farmers in local languages. *React, Firebase, ESP32, Python*

Earmark · Celo Agents at Work · **Winner, Best Stablecoin Adoption**

earmark-agent.onrender.com

Telegram agent on Celo that collects a shared bill and can only pay the wallet the group locked in at creation. Each share moves straight from payer to payee in one transaction, so there is no custody and no treasurer to trust. 25 stablecoins, x402 agent payments, ERC-8004 identity, live on mainnet. *Solidity, Celo, TypeScript, React, x402*

Equilux · Midnight Buildathon · **Wave 1 winner**

equilux-lac.vercel.app

Pay-gap reporting employees can check. A zero-knowledge circuit proves the published gap came from the full payroll, co-signed by workers, without revealing a salary. *Midnight, Compact, TypeScript, React*

EDUCATION

B.Eng. Electrical and Electronics Engineering

2021 - 2025

Federal University of Technology, Owerri (FUTO) · Electronics and Computing
Second Class Upper · CGPA 4.09 / 5.00

SKILLS

Languages	JavaScript, TypeScript, PHP, Python, C/C++, SQL, Motoko, Solidity
Web	React, Next.js, Tailwind CSS, Laravel, Node.js, MySQL, Firebase, REST APIs
Embedded	ESP32, ESP32-CAM, Arduino, Raspberry Pi, IoT sensors, Proteus
Onchain / AI	Solidity, Celo, Midnight, Zcash, Solana, zero-knowledge proofs, MediaPipe
Tools	Git, Linux, Vite, Vercel, Telegram Bots, Paystack
