PROFILE

Innovative **Full-Stack Developer and Embedded Systems Engineer** who builds end-to-end products that merge hardware intelligence with powerful software. My work spans production **React / Laravel** web platforms (LMS, e-commerce, directories), **ESP32 / IoT** systems, computer-vision apps, and **AI-driven blockchain** tooling. I've shipped 30+ projects — from an **AI + IoT multilingual crop-monitoring rover** to hackathon builds on **Zcash** and **OG** — and I'm happiest solving real-world problems in agriculture, automation, fintech and security. Driven by curiosity, engineering rigour, and shipping things that actually work.

EXPERIENCE

Software Developer · First Digit Communications Ltd.

Sep 2024 – Present

Abuja, Nigeria · Full-stack & embedded delivery

- Built and shipped **FirstDigit Academy**, a full learning-management system with course management, student enrollment, progress tracking and interactive learning — React, Laravel & MySQL.
- Developed **FirstSmart Mart**, a production e-commerce platform (cart, checkout, inventory, admin dashboard) integrating **Paystack** and bank-transfer payments on a Laravel API.
- Engineered a **face-recognition security & Telegram alerting** system using Node.js, face-api.js and **ESP32-CAM** for real-time suspect detection.
- Built **School Finder**, a Nigeria-wide school directory with rich filters and verified profiles, plus the **SOHADAN** association site and the First Digit corporate website.

Independent Developer · Full-Stack, IoT & Blockchain

2021 – Present

Self-directed product engineering & hackathons

- Designed and delivered **AgroSense360** — an AI + IoT multilingual rover for smart crop-health monitoring & advisory, combining AI vision, IoT sensors and a native-language advisory layer.
- Competed in blockchain hackathons — **Sign In With Zcash** (ZecHub) and **OG Receipts** (OG Zero Cup 2026) — shipping novel authentication and verifiable-AI primitives under deadline.
- Built and deployed crypto/blockchain tooling across **Solana**, **Internet Computer (Motoko)** and event-driven trading, alongside numerous responsive React + Tailwind interfaces.

SELECTED PROJECTS

AI, IOT & EMBEDDED SYSTEMS

- **AgroSense360 — AI & IoT Multilingual Rover**

Smart crop-health monitoring & advisory: AI vision + IoT sensors on a rover that advises farmers in their native language.

React · Firebase · ESP32 · Arduino · Python

- **Atelier Fit — Virtual Body Measurement**

[live ↗](#)

Estimates every tailoring measurement from two phone photos + height, suggests a ready-to-wear size and exports a measurement card. *React · Tailwind · Google MediaPipe*

- **Attendance System — RFID + ESP32-CAM**

[code ↗](#)

Attendance tracking with real-time analytics and automated reporting. *React · Firebase · ESP32-CAM*

BLOCKCHAIN & WEB3

- **Sign In With Zcash (SIWZ) + ZBooks**

[live ↗](#)

Non-custodial, drop-in wallet auth primitive for Zcash, plus accounting & payroll for shielded-ZEC teams. ZecHub Hackathon. *Next.js · TypeScript · ZIPs · ZingoLib*

- **OG Receipts — Verifiable AI Track Records**

[live ↗](#)

Tamper-proof AI predictions via TEE Sealed Inference on OG Compute, timestamped on-chain to OG Storage. OG Zero Cup 2026. *Next.js · OG Compute · OG Storage*

- **Theia Trading Bot**

[live ↗](#)

Multi-factor, event-driven trading system fusing on-chain flows, liquidations, unlocks and macro into one confluence-scored signal. *Node.js · Blockchain*

- **Solana Token Sweeper & Motoko Student Wall**

[code ↗](#)

Auto-swaps non-SOL tokens to SOL in any wallet; plus a decentralized student forum on the Internet Computer. *Solana · Motoko · Internet Computer*

FULL-STACK WEB PLATFORMS

- **FirstDigit Academy (LMS)**

[live ↗](#)

Full learning-management system: courses, enrollment, progress tracking & interactive learning. *React · Laravel · MySQL*

- **FirstSmart Mart & School Finder**

[live ↗](#)

Production e-commerce with payments, and a Nigeria-wide school directory with verified profiles. *React · Laravel · MySQL · Paystack*

- **SOHADAN & First Digit Websites**

[live ↗](#)

Association and corporate marketing sites with animated, high-performance interfaces. *React · Laravel · GSAP · MySQL*

TECHNICAL SKILLS

LANGUAGES

JavaScript, TypeScript, PHP, Python, C/C++
(Arduino/ESP32), SQL, Motoko, HTML, CSS

FRONTEND

React, Next.js, TailwindCSS, GSAP, Three.js, Framer Motion, Bootstrap

BACKEND & DATA

Laravel, Node.js, REST APIs, MySQL, Firebase

EMBEDDED & IOT

ESP32, ESP32-CAM, Arduino, Raspberry Pi, IoT sensors, Proteus, MediaPipe, face-api.js

BLOCKCHAIN

Solana, Internet Computer (Motoko), Zcash (ZIPs, ZingoLib), OG (Compute / Storage / TEE)

TOOLS & PRACTICES

Git, Linux, Vite, Vercel, Cloud Deployment, Telegram Bots, Paystack, REST APIs

EDUCATION

B.Eng. Electrical & Electronics Engineering

Aug 2021 – Oct 2025

Federal University of Technology, Owerri (FUTO) · Electronics & Computing major

Final-Year Project: AgroSense360 — AI & IoT-based multilingual rover for smart crop-health monitoring and advisory.

WASSCE — Senior Secondary Certificate

2014 – 2020

Federal Government College, Okigwe

HIGHLIGHTS

- 30+ projects shipped
- 2× hackathon builder
- Web + hardware + chain
- B.Eng graduate

LANGUAGES

English

Igbo

Fluent · Professional

Native

Austin-Chris Iwu · Full-Stack & Embedded Systems Engineer
